

# One Tool. Endless Productivity.

**DXS® Drive Xchange System™** Series

## What is it?

The DXS® Drive Xchange System™ is a patented system of impact wrenches and interchangeable drive accessories that let you perform multiple jobs with one tool.

Drive

Xchange System™

#### How does it work?

DXS® uses a proprietary spline-type interface that fits tighter and has more load bearing surface than a traditional square drive. 10 different interchangeable drives swap out quickly, so you save time and stay in service. Simply switch out anvils and sockets to the needed drive size and length – no adapters necessary!

## Interchangeable Game-Changer

DXS® Drive Xchange System™ provides increased productivity, extended tool life, and multi-job functionality without clunky adapters that drain your tool's power.

### **Never Lose Power**

The DXS® system features torque that works smarter, not harder. Tight-fitting DXS® attachments deliver up to 15% more motor torque to fasteners¹, making the tools more effective – so you never lose power.

<sup>1</sup>Compared to traditional square drive sockets

## **Frustration-Free Productivity**

Save space in your toolkit with the right tool for every time and place. Fast-swapping DXS® accessories let you configure the tool for the job at hand.

# **Get The Most Out Of Your Investment**

Increase your time in service and save replacement costs by simply switching out worn or broken drives to get the tool working like new.

## Patented Technology

Our spline drive design eliminates the frustration of power loss from wornout sockets and square drive anvils by delivering up to 20% longer wear.
